

Earth System Data Explorer Poster Card -Global Volcano Location

Teachers, are you looking for resources to help you engage students in data analysis related to Volcanic Eruptions? Check out this [poster card](#). These data show the number of known volcanic eruptions during the Holocene epoch (about 10,000 years ago to present) at each grid point on a 1-degree-by-1-degree grid.

Access the Card (PDF) for this topic by clicking [here](#).

Visualize NASA data on a custom map using our [Earth System Data Explorer](#). Generate your own maps and graphs using a range of datasets supporting this phenomenon.
